Amazon Free Tier Account Creation

Course	Cloud Infrastructure and Services (25CS2206E)
Experiment	1(a): Creating an AWS Free Tier account

1. Aim

To create an AWS free tier account to provision the resources, complete the required verification procedures, and successfully access the AWS Management Console.

2. Requirements

Requirement	Details
Web browser	Google Chrome or Microsoft Edge
Website	https://aws.amazon.com/free
Email ID	A valid email address to receive the OTP
Mobile number	Required for SMS (OTP) verification
Payment method	Credit/Debit card (Visa, Mastercard, RuPay, American Express) or UPI
Identity document	Aadhaar (through DigiLocker), voter ID or driving licence, if requested by AWS India
Account plan	Free plan (6 months)

3. Theory

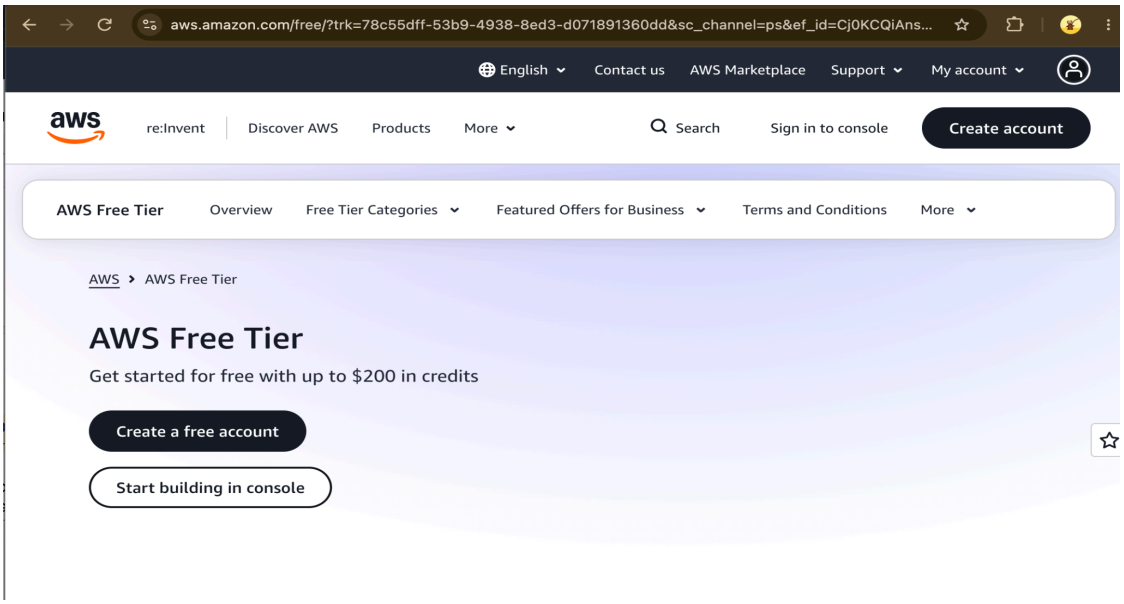

Amazon Web Services (AWS) is a cloud platform that provides computing, storage, networking and many other services on demand. A new user can start with the Free plan, which allows the user to learn and experiment with selected services for 6 months using free credits.

- **Root user:** The identity created when the AWS account is opened. It has complete access to all resources in the account.
- **AWS Management Console:** The web interface used to access and manage AWS services after signing in.
- **Account verification:** AWS verifies the email address (OTP), the billing method (UPI or card), the identity of the user and the mobile number (SMS code) before activating the account.

4. Procedure

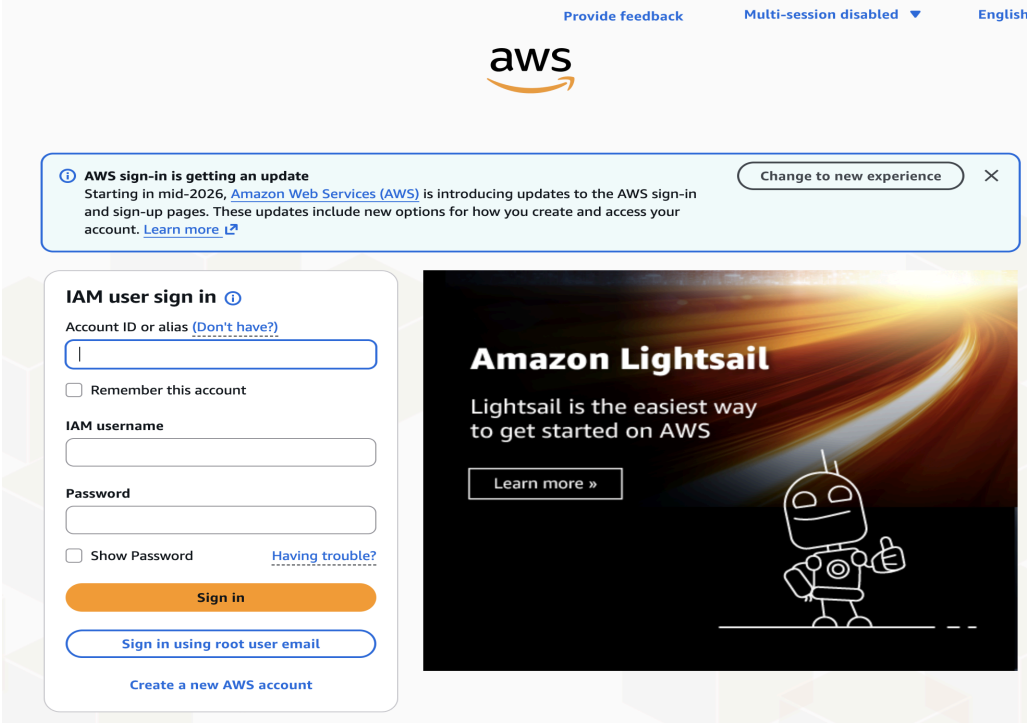

Step 1: Open the AWS Free Tier website

1. Open a web browser (Chrome or Edge).
2. Go to https://aws.amazon.com/free.

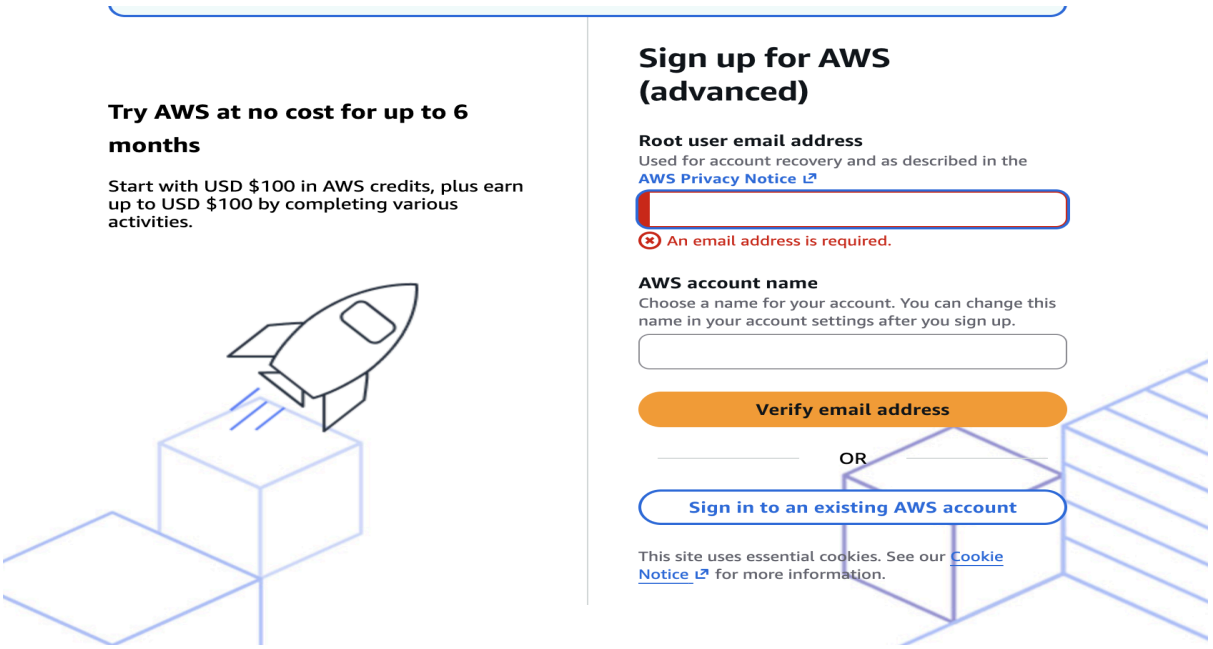

Step 2: Click Sign in to the Console

1. On the AWS page, click Sign in to the Console.

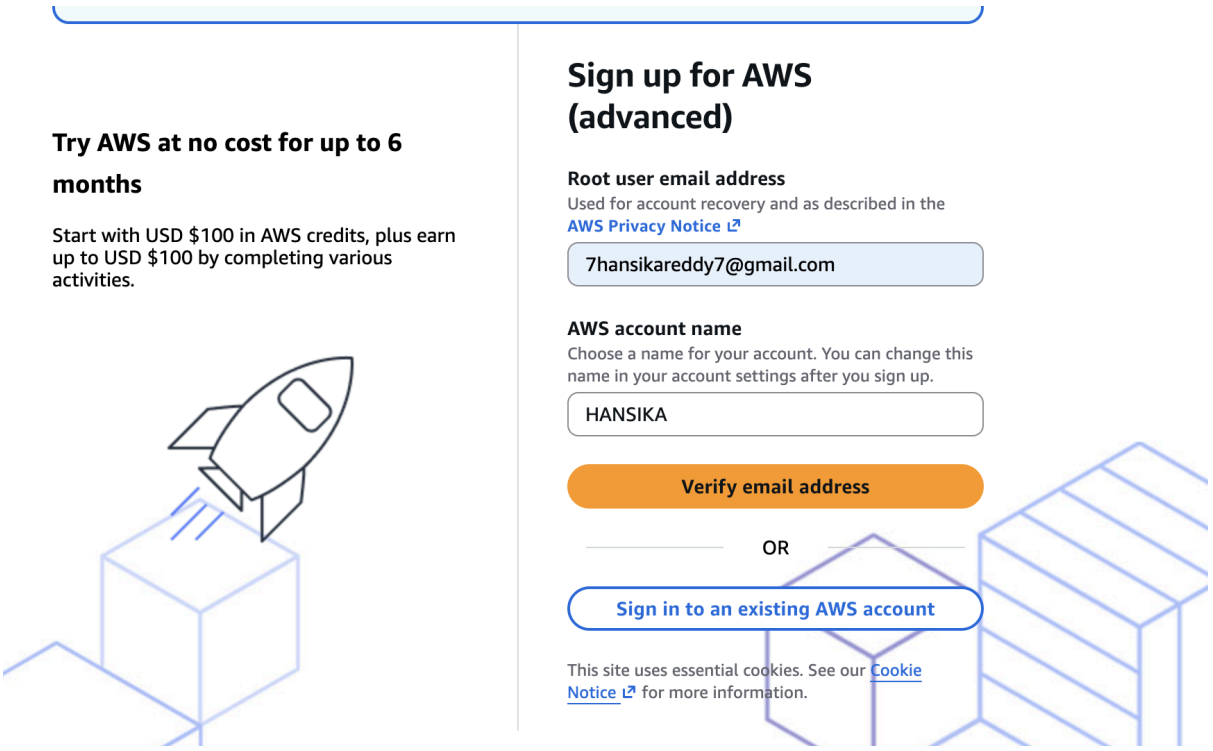

Step 3: Choose Create a new AWS account

1. On the sign-in page, click Create a new AWS account.

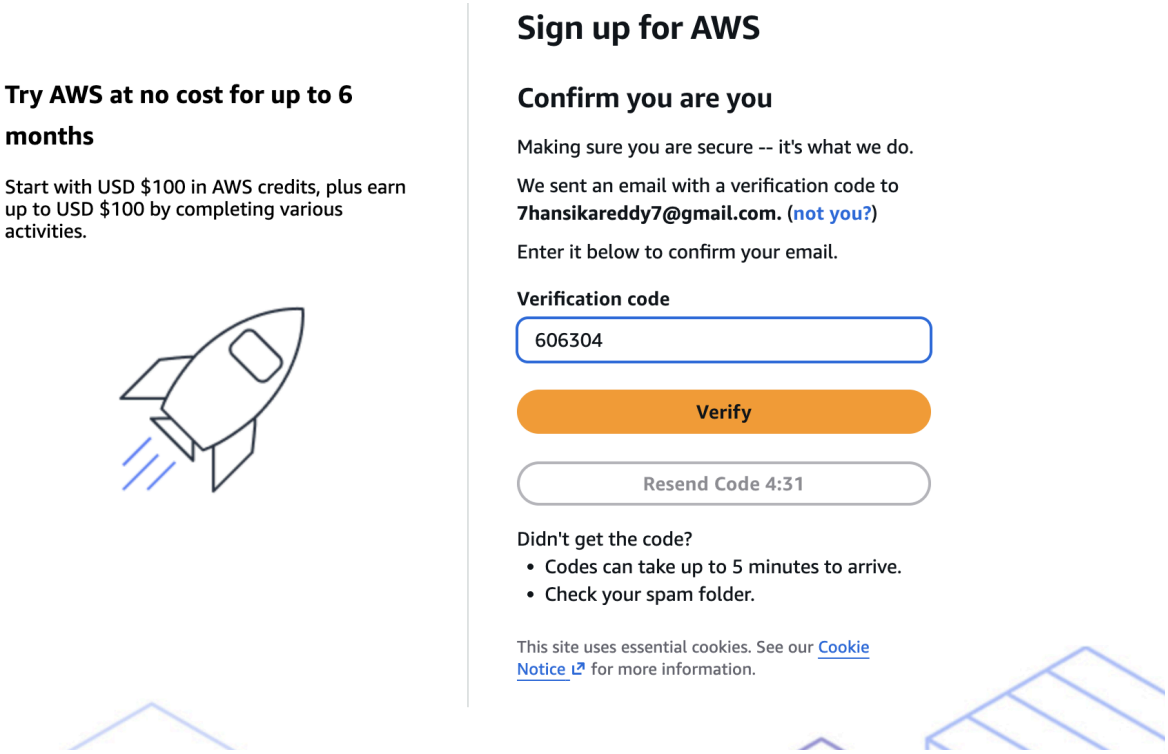

Step 4: Enter the account details

1. Enter the email address.
2. Enter a password.
3. Enter the AWS account name (e.g., StudentAWSAccount).

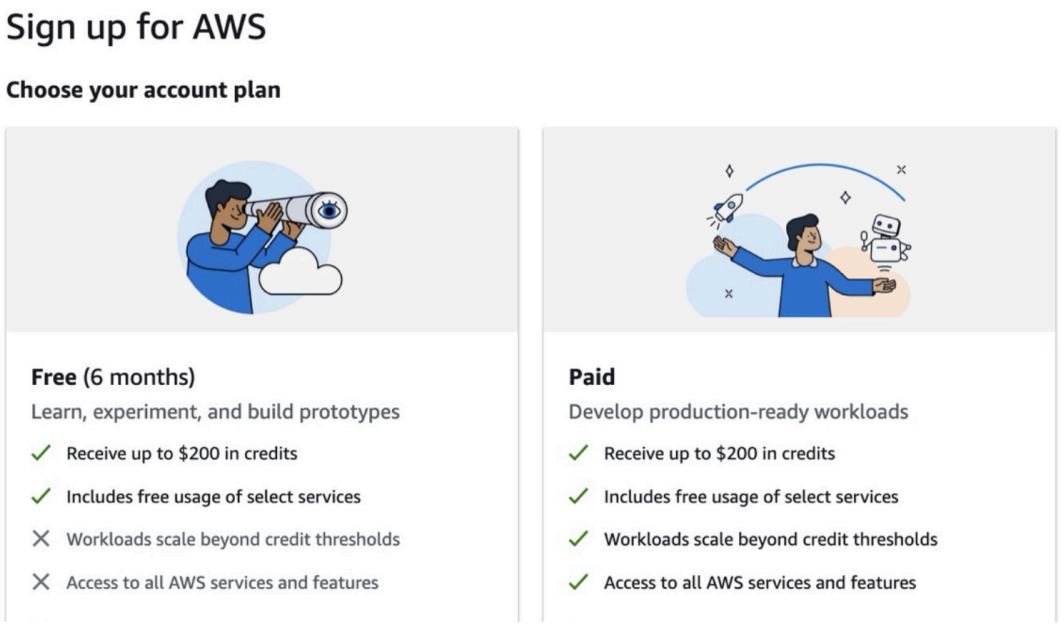

Step 5: Verify the email address

1. Click Verify email address.
2. Enter the OTP sent to the email.

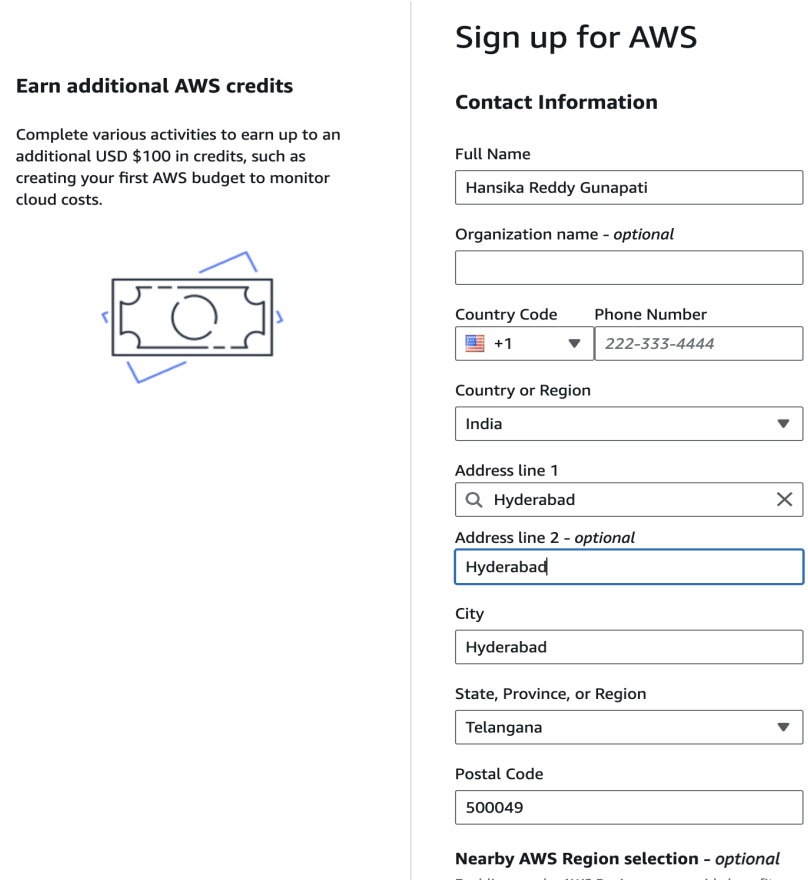

Step 6: Choose the Free plan

1. Under the account plan, choose Free (6 months).
2. Click Choose free plan.

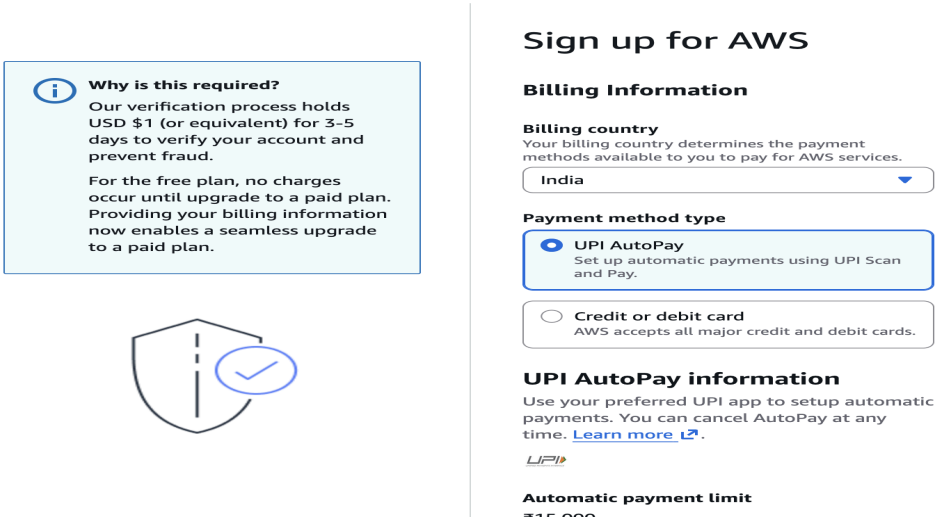

Step 7: Enter the contact information

1. Enter the full name, phone number and address.
2. Agree to the terms and click Continue.

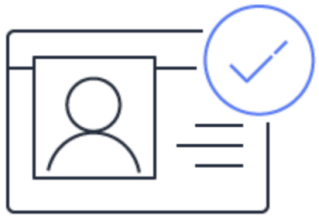

Step 8: Provide the billing information

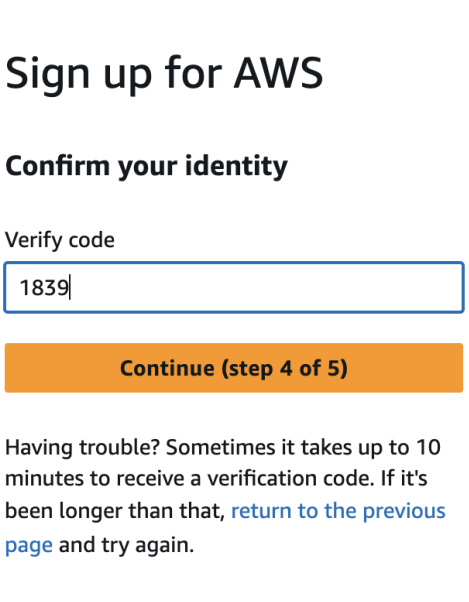

1. Choose UPI or Debit/Credit card and enter the details.
2. For UPI, an AutoPay limit of Rs. 15,000 is needed only for authorisation; the AutoPay can be deleted later.
3. For a card, a temporary Rs. 2 verification charge may apply, which AWS refunds.

Step 10: account set-up verification

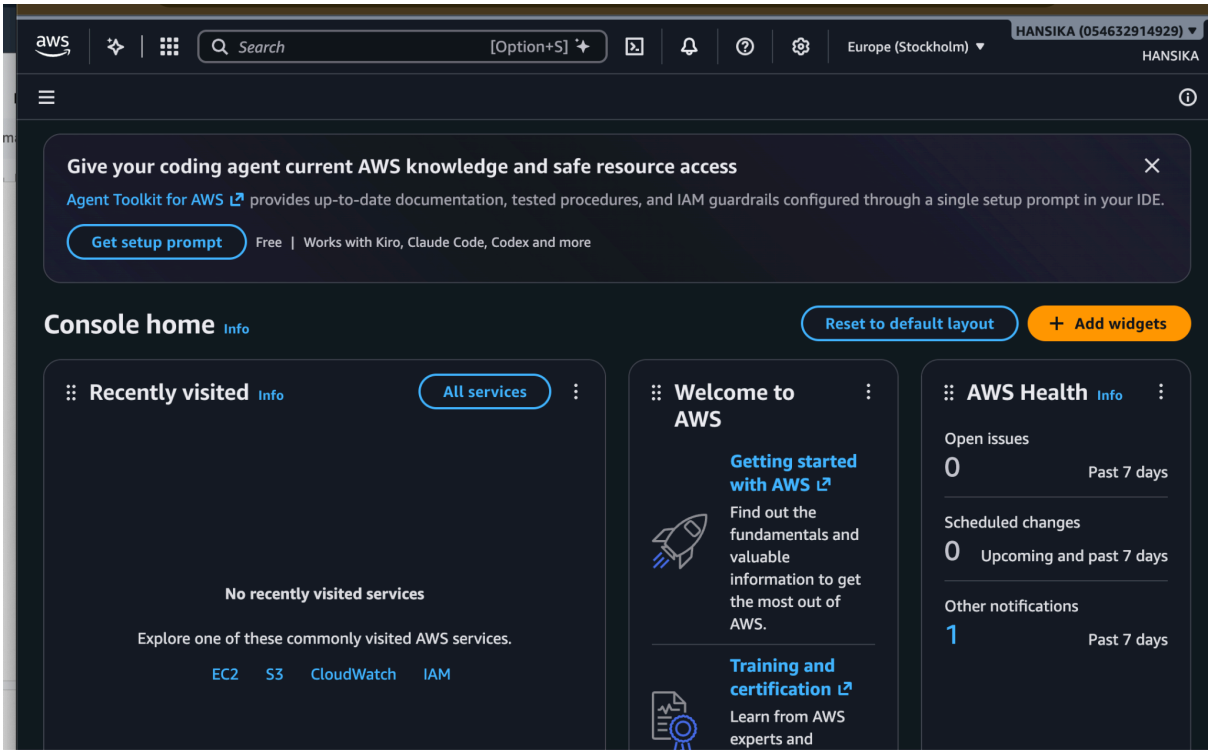

1. Wait for about 1 to 2 minutes while AWS sets up the account.

Step 11: Open the AWS Management Console

1. The AWS Management Console dashboard appears after the set-up.
2. Alternatively, sign in at https://console.aws.amazon.com using the root user email and password.

5. Observation

Parameter	Observation
Email verification	The OTP sent to the email address was accepted
Account plan	Free plan (6 months) was selected
Billing verification	Completed using UPI / Debit or Credit card
Identity verification	Completed (purpose: Academic, ownership: Individual)
Mobile verification	The SMS verification code was accepted
Account set-up time	About 1 to 2 minutes
Console access	AWS Management Console dashboard was displayed; account name shown at top-right

6. Result

- An AWS Free Tier account was successfully created and verified.
- The AWS Management Console was accessed using the root user credentials.
- The Free plan information and the AWS services under the plan were accessible.

7. Conclusion

An AWS account can be created in a few verification steps (email, billing, identity and mobile) and the Free plan lets a student explore AWS services at no cost during the first 6 months. After the account is active, the AWS Management Console is the starting point for provisioning and managing resources.
